

Financial Assistance – Patients

Policy and Procedure

Issued: January 1, 2017 | Policy #: BC ADM 06
Approved by: John Gantner, BayCare CFO

Purpose

BayCare Health System hospitals are not-for-profit entities established to meet the health care needs of the residents of the communities they serve. Accordingly, the hospitals provide emergency and other medically necessary care, without discrimination, regardless of the patient's financial assistance eligibility. The hospitals also provide other medical care services to certain individuals for which they receive no payment. This policy will provide a systematic method for identifying and distributing financial assistance to the residents of the communities served by all of the hospital facilities.

Policy

BayCare Health System will provide financial assistance to hospital patients who are determined unable to pay for services due to financial hardship. Two programs are used to qualify patients for financial assistance:

1. **AHCA Charity**, under guidelines established by the state of Florida, is available to patients with family incomes under 200 percent of the federal poverty level or whose hospital-related expenses exceed 25 percent of the annual family income.
2. **Hardship Charity**, under guidelines established by BayCare Health System, extends beyond AHCA charity limits and includes patients with family income up to 250 percent of the federal poverty level.

Patients who have submitted complete financial information and qualified for financial assistance will not be subject to any billing and/or collection actions with no expectation of payment. Expected payments for services covered under this policy will not be over, under or at the amounts generally billed (AGB), which are the total amounts Medicaid would allow for such care. In addition, hospitals provide care for emergency medical conditions for patients regardless of source of payment, eligibility for financial assistance or lack of insurance coverage, and no requests for payment will be made before a medical screening is completed. Nor will the hospitals engage in debt collection activities that interfere with the provision of emergency medical care or take other actions that discourage individuals from seeking emergency medical care. Financial Assistance team members will be available to patients during designated times to assist patients with determining their eligibility for federal, state

and county financial assistance programs. Final authority for determining eligibility and whether reasonable efforts were made to determine eligibility for financial assistance lies with the Director of Financial Assistance.

Measures to widely publicize the BayCare Financial Assistance Policy and related documents to patients, family members, visitors and the general public will include, but are not limited to:

- Financial assistance-related documents include the full policy, plain language summary statement of the full policy, the application for financial assistance and directions for completion, and a list of non-employed providers of emergency and medically necessary care in the hospital facility that indicates whether they are covered/not covered under this financial assistance policy. All financial assistance-related documents will be available in languages identified as representing the lesser of 5 percent or 1,000 individuals of the populations likely to be affected, encountered or served by the hospitals as determined by registration and translation services data.
- All financial assistance-related documents described above will be available on hospital facilities' websites and the BayCare corporate website, and from registration, emergency department and Financial Assistance offices in all hospital facilities in English and translations in all identified languages, upon request and at no charge through paper copies, by mail or electronically to the patient.
- Signage in registration areas and emergency rooms will reference the availability of financial assistance.
- Discharge instructions to all patients will include a copy of the plain language summary.
- Patient information brochures/packets will reference the availability of financial assistance.
- Patients will be advised of the availability of financial assistance in the registration and scheduling process when they voice concerns regarding payments.
- Patients will be informed of the financial assistance policy on statements after services are rendered. Information on each statement will include the URL

where all financial assistance-related documents can be obtained and the telephone number to call for more information about the financial assistance policy and application process.

- Community agencies serving those citizens in the service areas of the hospitals that are most in need of financial assistance will be identified through the Community Health Needs Assessment and other related means. They will be provided financial assistance documents and avenues to assist individuals in need of financial assistance through the hospitals.

Methods for applying for financial assistance:

Financial assistance-related documents and assistance with the application process can be obtained from registration, emergency department and Financial Assistance Offices within each hospital facility. In addition, a request for mailing the financial assistance-related documents can be made by calling (855) 233-1555, or the documents can be printed directly from the hospital or corporate website. Completed applications may be returned to the area where they are obtained in the hospital, by mail, by fax or by email as noted on the application directions. Financial assistance applications completed for non-hospital related services may be used to determine financial assistance eligibility for hospital-related services.

The following documentation or information may be used to determine financial assistance eligibility:

- Signed financial assistance application acknowledging that providing false information to defraud the hospital is a misdemeanor in the second degree (Section 817.50 F.S.)
- Income documented by one of the following: W-2 withholding forms, employer paystubs, previous year federal tax return, verification of current wages from employer(s), from public welfare agencies or other governmental agency which can attest to the patient's income status for the past 12 months
- Patient information may be verified through a consumer credit report, property searches or other means to substantiate a patient's financial circumstances.

Information needed to determine financial assistance eligibility includes the patient's demographic information and income, household members' names, birthdates and social security numbers, and income for all household members. Household members include family members who were claimed on a patient's income tax from the prior year or to be claimed in the next tax filing period. Other family members who are being directly supported by the patient may be included on the application, if that inclusion speaks to the patient's need for financial assistance.

Additional financial documentation is not required from the patient but may be requested to validate financial assistance eligibility when there is evidence of a patient's ability to meet their financial obligations. This financial documentation includes the most recent tax returns and most recent bank checking and savings account statements. Medicare recipients must provide proof of income and assets to be considered for financial assistance. When financial documentation is required for further review of the patient's financial situation, assets and available credit may be considered in the financial assistance eligibility review. If available liquid assets in the form of checking and savings balances exceeds five times the patient responsibility amount, the patient will not be considered for financial assistance.

Applications will be reviewed within 30 days and notification of eligibility will be provided by mail or by email upon patient request. A patient may appeal a denial by phone, by email, by fax or by letter with an explanation of their financial circumstances and documentation related to their extenuating circumstances. The final decision on an appeal will be made by the Director of Financial Assistance.

Open balance accounts for a year prior to the date of the original application and subsequent hospital services for a year from the date of the original application will qualify for Financial Assistance if the hospital determines that the applicant qualifies for financial assistance. If a patient submits an incomplete financial assistance application within 240 days of the first post-discharge billing statement for the care for which they are requesting financial assistance, they will be notified which necessary information is missing with a copy of the plain language

summary of the Financial Assistance Policy, and any collection efforts related to charges for that care will be suspended. This includes collection efforts by the BayCare Central Business Office, and primary and secondary collection agencies. Patients may request financial assistance up to one year after the date of service. Patients who qualify for financial assistance will have their balance adjusted to zero, collection efforts will cease permanently, and notice will be sent to any credit bureau where adverse information had previously been reported.

Criteria used to determine a patient's eligibility for financial assistance:

1. Financial assistance under this policy will not be provided to non-Florida residents who are citizens of other countries for planned procedures not related to continuity of care, individuals who are eligible for other third party coverage but choose not to use their coverage, or patients who seek care outside of their provider network or from outside of the hospital service area for non-emergency care.
2. The following services are deemed to be not medically necessary and not eligible for financial assistance under this policy: Experimental, related to a research study, a bariatric surgical procedure, a pricing package or an elective cosmetic procedure.
3. Patient income must meet one of the following criteria:
 - a. Florida Agency for Health Care Administration (ACHA) Charity Guidelines: Family income for the 12 months preceding the determination does not exceed 200 percent of the current federal poverty guidelines, and/or the unpaid portion of the hospital bill due from the patient exceeds 25 percent of the annual family income. The total family income cannot exceed four times the federal poverty level for a family of four regardless of the charges due from the patient. Other AHCA-eligible patients include Medicaid eligibles, patients under county assistance programs, and Medicare/Medicaid eligibles who have exhausted benefits or are receiving non-covered services.
 - b. BayCare Hardship Charity is extended to a patient who meets any of the following guidelines:

- i. A financial assistance application form with income information indicating family income up to 250 percent of FPL
 - ii. Patients with Medicaid or county-run indigent health care programs in the immediately prior or subsequent six months to the date of service under review
 - iii. Charges not covered under Medicaid as part of the Medicaid patient's share of cost
 - iv. Patients identified as homeless or deceased patients with no estate
 - v. Patients referred from community organizations which have agreements with individual hospitals to provide specific services to identified patients with no charge to the patient, i.e. community free clinics and mammography voucher programs. Hospitals will attempt to obtain a financial assistance application form to consider for AHCA charity. These patients will be considered as eligible for financial assistance under this policy if they do not meet AHCA guidelines.
 - vi. Patients listed as homeless or where an inability to pay is indicated based on diagnosis, employment status and payment history and no financial screening form is available.
 - vii. Patients exceeding other criteria with a documented financial hardship or extenuating financial circumstances.
4. When further financial information has been requested from a patient and available liquid assets, in the form of checking or savings balances exceeds five times the patient responsibility amount, the patient will not qualify for financial assistance. Uninsured patient balances and patient balances after insurance are eligible for financial assistance. Presumptive financial assistance decisions may be determined based on third party analytics, using a credit inquiry process, under the following circumstances:
 - a. Uninsured accounts of patients not seen by the Financial Assistance team or without a current financial assistance application on file
 - b. The reported federal poverty level (FPL) of the patient meets the criteria for financial assistance

Prior payments and refunds for financial assistance eligible patients

Prior payments for care approved for financial assistance will be refunded to the patient. Refunds are limited to hospital-based services provided by the hospital. When further financial information has been requested from a patient and available liquid assets, in the form of checking and savings, exceeds five times the patient responsibility amount, prior payments will not be refunded as the patient will be deemed not eligible for financial assistance.

Billing and Collections

Uninsured patients not qualifying for financial assistance will qualify for a 40 percent discount from billed charges and an additional 10 percent discount if paid in full within 30 days of the first statement in accordance with the Uninsured Patient Discount Policy. These 40 percent and 10 percent discounts do not constitute “financial assistance” under this policy.

All patients with outstanding balances and not determined to be eligible for financial assistance will be subject to standard collection processing and may result in turnover to a collection agency. Accounts with unpaid balances and not in an established payment plan will transfer to a collection agency 120 days from the first

post-discharge billing statement and after three billing statements that have contained the plain language summary of the financial assistance policy.

Extraordinary collection actions (ECAs) will not occur on outstanding patient balances prior to making all reasonable efforts to determine if a patient is eligible for financial assistance. These efforts include:

- All actions previously described in this policy
- An attempt at oral notification of the pending ECA at least 30 days prior to implementing the ECA
- A written notice, provided at least 30 days prior to implementing the ECA, indicating that financial assistance is available for eligible individuals, identifying the ECA(s) the hospital (or collection agency) plans to take against the individual, including a plain language summary of this policy, and stating a deadline after which the ECA(s) will be taken that is at least 30 days after the date of the written notice
- Waiting at least 240 days after the date of the first post-discharge billing statement for emergency or other medically necessary care before engaging in ECAs related to unpaid balances for that care.

ECAs may include the following: Debt reported to a consumer credit reporting agency or credit bureau, legal or judicial processes to collect the debt, sale of the debt, lawsuits or liens against the patient or patient’s property, or requiring payment on past unpaid bills for FAP-related care before providing medically necessary care. Patients who qualify for financial assistance during the collection process and within one year from the date of service will have their balance adjusted to zero, collection efforts will cease permanently, and notice will be sent to any credit bureau where adverse information had previously been reported. All contracted parties involved in debt collection activities on behalf of BayCare Health System and affiliated hospital facilities will be subject to all financial assistance and billing and collection standards included in this policy.

Hospital websites where all financial assistance documents (this policy, a plain language summary of the policy, the application for financial assistance, a list of non-employed providers of emergency and medically necessary care in the hospital, and translations of these documents) can be obtained online:
